

# DHRUVAL JAVIA

Dhruval is an ingenious mechanical engineer, enthusiastic about solving global climate and energy problems through innovation and sustainability-driven outlook. With two years of experience, he is adept in modelling and analysis of thermal and electrochemical system.

## EDUCATION

Year	Institute	Qualification	CGPA
2024 – present (Expected 06/2026)	Stanford University	M.S. in Mechanical Engineering (Depth in Energy and Transport Sciences)	3.739/4
2018-2022	Indian Institute of Technology, Bhubaneswar	B. Tech. in Mechanical Engineering	9.39/10

## WORK EXPERIENCE

### THERMAX LTD. | Trainee – Advent Rotational Program | August 2022 – July 2024

- Conducted stage-wise tracking of boiler assembly on the factory floor, proposed manufacturing process automation enhancements, and prepared detailed **RLA** and **RCA** reports following site evaluations.
- Lead a team project on **standardization of the design and techno-commercial offering of a biomass-fired thermal oil heater**, leading to a **7.4% reduction in total weight** and a **10.2% decrease in total footprint area** as compared to the previous design. Activities involved include *grate & BOP/auxiliary equipment sizing, layout preparation, thermal & pressure drop simulations, and maximum film temperature & efficiency calculations*.
- As part of the project, developed a **thermal model** of the **APH, Economizer** and **MPA furnace** in **EXCEL** with **VBA automation** to iteratively design the heater, and validated it with existing data. The model provided *inlet/outlet temperature values within 2%, 6% and 10% error* in APH, Economizer and MPA furnace respectively.

## ACADEMIC PROJECTS

### EFFICIENT BATTERY THERMAL MANAGEMENT SYSTEMS FOR EV | COMSOL, Electrochemical Modelling

#### 2021-2022 | Final Year B. Tech. Thesis Project | Supervisor: Dr. B. R. Pattabhi

- Performed degradation studies through **multiphysics numerical simulations** using **COMSOL** software by employing a **coupled 1-D electrochemical and 2-D thermal model of the battery pack** integrated with a **capacity fade model**.
- Published the work in the “**Energy Storage**” journal having an *impact factor of 3.2*.

### MACRO-SCALE DESIGN ASPECTS OF EV BATTERY PACK | MATLAB, Excel, Battery Pack Design

#### 2021 | Summer Research Internship Project | Supervisors: Dr. Sundararajan Natarajan (IIT Madras) and Dr. B. R. Pattabhi (IIT Bhubaneswar)

- Performed battery pack design calculations by developing a system of equations in **EXCEL** and implementing it in a **MATLAB app**. The app sliders be used to analyse the effect of battery pack design parameters on EV performance.

### AEROCASE | Sheet Metal Working, TIG Welding, Sand Casting, Wood Working, 3D Printing, Fusion 360

#### 2025 | Individual Course Project | ME 203: Design and Manufacturing, Stanford University

- Designed and fabricated a compact, innovative, and functional instrument case that ensures the safe storage of Aerodrum instruments while reflecting the aesthetic essence of music.
- Materials used include *Al 5052 aluminum sheet, A356 cast aluminum, pine wood, Duron, and polyurethane foam*.

### GAS DYNAMICS SIMULATOR | MATLAB, Vector Algebra, Hash Grid Optimization

#### 2025 | Individual Personal Summer Project

- Built a **MATLAB-based simulator** for particle dynamics and association chemical reactions in an ideal gas, implementing **hash grid optimization** to reduce collision detection algorithm complexity.
- Developed an interactive MATLAB app with numeric and GUI-based input to improve user experience, providing time-series plots and dynamic animations as post-processing outputs for analysis.

## TECHNICAL SKILLS

SolidWorks

ANSYS

COMSOL

Arduino

Python

MATLAB

Cantera

## COURSEWORK

Thermodynamics

Numerical Analysis

Heat Transfer

Physical Gas Dynamics

Chemical Kinetics

## **EXTRA-CURRICULAR ACTIVITIES**

- Associated with the **robotics society** and **music society** (*as a drummer*) at IIT Bhubaneswar (2018-2022).
- Held the position of **Student Placement Coordinator** (2022) and *coordinated with various internal and external stakeholders* such as institute's placement cell, company recruiters and students for ensuring a smooth placement process.
- *Participated and lead* a team of 4 members in the **annual e-yantra robotics competition** (eYRC 2019-2020) organized by IIT Bombay.
- Achieved **5th rank** out of 82 participants in the **GrabCAD shop challenge** (2020) held online on the GrabCAD community website. The challenge involved *designing an innovative product which can be 3d printed*; have made a *2-in-1 mechanical hand blender cum egg beater*, and have submitted CAD files along with a stress analysis report. **SolidWorks** and **ANSYS** was used for CAD modelling and analysis.
- Achieved **2nd rank** in the *eastern fusion group music competition – “Sargam”* organized as a part of Spring Fest 2020 at IIT Kharagpur.
